

Testimonials

"Anodyne is truly an innovative therapy - especially for those of us who are quite opposed to drug therapy and their possible/probable side effects. Thanks to my initial 12 week Anodyne trial I am now sleeping most of the night and there is no doubt the burning pain in my feet has abated considerably. I'm confident that continuing Anodyne Therapy will be of benefit to me. I certainly owe the individual who recommended Anodyne to me a huge Thank You!"

J.F. (Broomfield, Co)

"I have used Anodyne Therapy for over a year and a half. It has changed my life and my pain. Walking became painful, and a problem. At night the pain was dreadful, causing many sleepless and painful nights. After 2 weeks of treatment at the hospital, I noticed relief, and gradually, the night pain subsided. I call it the miracle of my life."

B.F. (Fairfield, IA)

"I use Anodyne Therapy 6-7 times a week and it has changed the pain in my feet more than tremendously! Prior to treatment, I cried everyday because the pain was so so bad. Burning - FIRE like pain, feeling like I was being sliced by a knife and more. Now there are actually times I have none of that at all. I thank God for Anodyne Therapy."

K.W. (Hampstead, NH)

"I suffered extreme pain in both my feet and hands. The pain was unrelenting, as I tried to rub or walk the pain away. I called my endocrinologist who sent me to a physical therapy facility where I received Anodyne Therapy treatments. I found almost immediate and complete alleviation of the pain. I now use my home Anodyne Therapy treatments (Model 120) as a way to control the pain. Having a home unit is empowering because I know that I have a way to keep myself from this form of suffering."

M. D. (Los Angeles, CA)

"During my 27 years in practice, I have cared for thousands of patients suffering from painful circulatory problems caused by chronic conditions such as diabetes. When Anodyne Therapy is utilized as part of a comprehensive plan of care, I have seen significant improvements in my patients' pain and their quality of life. Anodyne Therapy is the first treatment I have found that treats not just the symptoms, but also one of the underlying causes of the pain - poor microvascular blood flow. Anodyne Therapy has become a welcome adjunct to my therapeutic arsenal."

Neil J. Goldberg, MD, Diabetologist - Associate Professor of Medicine, UCLA

"With over 35 years of experience in Private Practice, I began using Anodyne Therapy to help capture additional referrals from an entirely different physician group and patient population. I have seen dramatic results with not only diabetic patients, but those with balance disorders that go hand in hand with lower extremity pain. Anodyne has been an excellent physician and direct patient marketing tool for my practice."
